

# International Services

SMC can help you implement these services.

## Invincible Data System

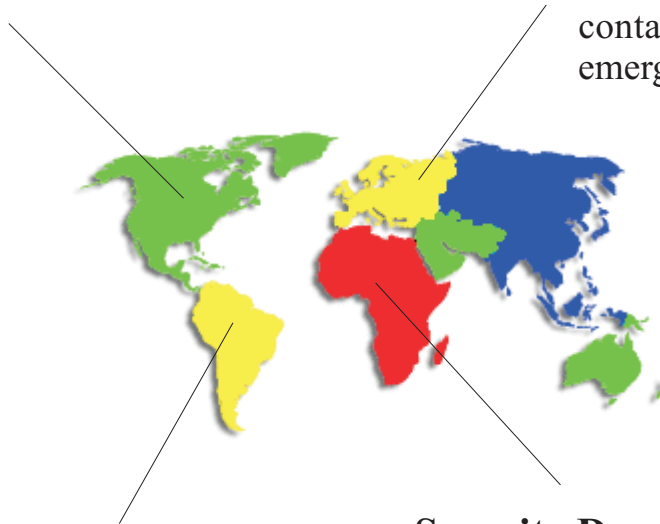

Designed by SMC, *Invincible* is a personnel information storage and retrieval system. Using advance data encryption techniques, the system ensures that critical employee information is secure and available in an emergency situation:

- Medical information
- Fingerprints
- Emergency contacts

## 24 Hour Emergency Line

Worldwide calls are answered at PDL's International Call Centre on a priority basis, at which point the operator connects the caller to an SMC consultant. The entire call is digitally recorded for future reference.

Service includes a list of global contacts to provide timely emergency assistance.

## Traveller Tracking

Employee travel is monitored by SMC for the purpose of advising travellers who might encounter a dangerous situation and for the emergency location of an individual.

## Security Daywatch & Travel Advisory

SMC watches and analyzes security-related matters in countries of interest.

Clients are emailed security incident reports and travel advisories as required.
